## Identifying Data and Data-Based Decisions Worksheet

The community assessment team can complete this worksheet as it prepares the community assessment report.

- 1. List the discoveries identified through internal and external data collection.
- 2. Identify the source or data gathering techniques, such as surveys, focus groups.
- 3. Note where the data have supported a recommendation in the community assessment report.
- 4. If your analysis indicates that a decision was made without supporting evidence, then go back to find supporting evidence or reconsider your decision.

| Evidence   |   | Types of Decisions Required by Head Start Regulations Based on Community Assessment Data |                                    |   |  |   |                               |
|--|---|--|------------------------------------|---|--|---|-------------------------------|
| Data Discovery<br>from Internal<br>or External<br>Data | Data Collection<br>Technique or<br>Source | Strategic<br>Long-Term<br>Goals and<br>Measurable<br>Objectives                          | Program<br>Options and<br>Calendar | Recruitment Areas and Program Locations | Recruitment, Selection Criteria, and Enrollment Priorities | Services and<br>Coordinated<br>Approaches | Collaborative<br>Partnerships |
|  |   |  |                                    |   |  |   |                               |
|  |   |  |                                    |   |  |   |                               |
|  |   |  |                                    |   |  |   |                               |
|  |   |  |                                    |   |  |   |                               |
|  |   |  |                                    |   |  |   |                               |
|  |   |  |                                    |   |  |   |                               |
